The Physics Classroom Topics

1-D Kinematics

The motion of objects in one-dimension are described using words, diagrams, numbers, graphs, and equations.

Work through Lessons 1-6 for 1-D Motion.

For further understanding, there are fun interactives for **1-D MOTION** on the tabs to the left labeled Physics Interactives and Concept Builders.

Physics Interactives

Concept Builders

I need you to have a good understanding of position, velocity, and acceleration when you show up in August. Nothing to turn in. Have fun with the games provided within the interactive and concept building pages.

I will be checking my emails weekly during the summer if you have any questions at smorse@auhdschools.org

Have a relaxing summer☺!

Mrs. Morse
