

An Introduction to College Testing

Want your best SAT or ACT score? Start with PSAT

The best way to prepare for college entrance tests is to view preparation as a process. First, begin to learn how the tests are formatted and presented, then take the PSAT, then learn about the ACT ... then choose which test you will take.

This effective, fast-moving introduction to college entrance exams will get you started. When students are familiar with the PSAT format, have a strategy for each section, and have begun to learn the frequently tested concepts, their scores provide an accurate assessment of the areas which need improvement before taking the actual SAT or ACT.

Important Note: The SAT and ACT are similar, so specific strategies will help for both tests.

The first 3 sessions include:

- Analysis and strategies for the Reading, Writing and Language, and Math sections
- Review of frequently tested concepts
- Practice on all sections of the test
- Compare the SAT and ACT

The 4th session is for students and parents:

NOTE: Meets in JANUARY **after** students receive their actual PSAT scores.

- Analyze and interpret actual PSAT results: areas that need attention; what scores students can expect on the SAT
- Compare the SAT, ACT– how to choose which test to take
- Review entrance test requirements for college admission

The SAT and ACT Tests are very vulnerable to preparation. Test-makers must avoid large fluctuations in scores - large fluctuations would make the tests useless to college admission staffs. To reduce fluctuations, the SAT and ACT tend to repeatedly test the same concepts, especially in the math and grammar sections. When students learn or review the repeated concepts and learn effective test-taking skills, they can attain their highest scores.

NOTE: Register for the October PSAT test through **Acalanes High School**. Seminar fee does **not** include the cost of the test.
