Public Notification of Non-Discrimination

The Acalanes Union High School District (AUHSD) is committed to equal opportunity for all individuals in education. District programs and activities shall be free from discrimination based on race, color, ancestry, national origin, ethnic group identification, age, religion, actual or potential family or marital status, or the exclusion of any person because of pregnancy or related conditions, physical or mental disability, sex, sexual orientation, gender, gender identity or expression, or genetic information; the perception of one or more of such characteristics; or association with a person or group with one or more of these actual or perceived characteristics.

The AUHSD's Career and Technical Education (CTE) program does not discriminate in enrollment in or access to any of the CTE programs available. Admission to these programs is based on age appropriateness, class space, interest, aptitude, and prerequisite coursework (where applicable). The lack of English skills shall not be a barrier to admission to or participation in the District's activities and programs. The AUHSD also does not discriminate in its hiring or employment practices.

This notice is provided as required by Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, Title IX of the Education Amendments of 1972, the Age Discrimination Act of 1975, and the California Code of Regulations Title 5, Chapter 5.3 Nondiscrimination. Questions, complaints, or requests for additional information regarding these laws may be forwarded to the District's designated compliance coordinators. All AUHSD compliance coordinators can be contacted at 925-280-3900, 1212 Pleasant Hill Rd., Lafayette CA, 94549

Section 504 Coordinator:

Karen Heilbronner, Director of Special Education & Auxiliary Services

Title IX Coordinator:

Amy McNamara, Associate Superintendent of Administrative Services

Title II Coordinator:

Aida Glimme, Associate Superintendent of Educational Services

CCR Title 5 Coordinator:

Amy McNamara, Associate Superintendent of Administrative Services

CTE Program Coordinator:

Aida Glimme, Associate Superintendent of Educational Services

AUHSD Graduation and College Admission Requirements

Students are required to earn 240 credits for graduation. Ten credits are granted for successfully completing a course that meets each day for a school year; five credits are granted for a semester course.

Subject Area	AUHSD Graduation Requirement (ACIS has a 205 graduation credit requirement – for details please visit the AUHSD or ACIS website)	University of California (UC) and Cal State University (CSU)
English	40 Credits English (Course must be a grade level English course)	40 Credits College Prep English
Math	<i>30 Credits</i> Algebra 1 and two semesters of math beyond Algebra 1. Up to 10 credits may be obtained by completing Computer Science.	30 Credits (40 Credits recommended) Through Algebra 2
Science	20 Credits One year Physical and One year Life Science	20 Credits (30 Credits recommended) Lab Sciences: Physical and Life
Social Studies	30 Credits World History/Geography US History Government/Economics	20 Credits World History US History (or semester of US History and semester of Government)
Visual/Performing Arts	<i>10 Credits</i> One year of Visual or Performing Arts	<i>10 Credits</i> One yearlong course
World Language	20 Credits Two years in any of the following areas:	20 Credits (30 Credits recommended) Two years of the same language
Career Technical Education	World Language, American Sign Language, or Career Technical Ed	None
Physical Education	20 Credits PE 9 and additional 10 credits	None
Health	5 Credits Human and Social Development Course	None
Electives	65 Credits	10 Credits College Prep electives
TOTAL	240 Credits	NA

AUHSD Graduation and College Admission Requirements

University of California

Students interested in attending one of nine University of California campuses must satisfy the following requirements:

- Complete a minimum of 15 college-preparatory courses (a-g courses) with a C or better in each course
- Earn a grade point average (GPA) of 3.0 or better in a-g courses with no grade lower than a C. Students who do not meet a 3.0 GPA requirement must submit SAT or ACT test scores to meet eligibility index requirements.

Students are encouraged to visit: <u>http://admission.universityofcalifornia.edu</u> for detailed information.

California State University

Students interested in attending one of California State University campuses must satisfy the following requirements:

- Complete a minimum of 15 college-preparatory courses (a-g courses), with at least 11 finished prior to the beginning of 12th grade.
- Earn a grade point average (GPA) or 3.0 or better in a-g courses with no grade lower than a C
- Meet the examination requirements by taking the ACT plus Writing or the SAT by December of senior year. SAT Subject Tests are no longer required but may be recommended by certain campuses or programs.

Students are encouraged to visit: <u>www2.calstate.edu/attend/admissions</u> for detailed information.

Private College Requirements

Private colleges do not often publish a firm list of required courses. The list of courses required by the University of California provides a guideline for the high school courses that should be taken to qualify for admission to private colleges. Many students take advantage of Advanced Placement (AP) courses offered as these courses are viewed positively by the private colleges. Many students attend private colleges each year with campus choices ranging from large, well-known universities to smaller institutions with highly-focused curricular offerings.

Community College Requirements

Community colleges provide quality, affordable educational options for students. There are 114 community colleges in the state of California and many students choose to begin their higher education at one of these institutions. At a community college, students can earn a two-year associate's degree, a certificate in a particular field, remediate their skills and improve upon their English skills among other things. First priority for student enrollment in the California Community College System is given to students who have either graduated from high school, did not complete high school by the date of their class graduation, or have reached the age of 18. Additionally, community college districts may enroll students for other reasons, such as a student being identified as highly gifted or a student's academic record demonstrating that he/she would benefit from academic enrichment.

All Acalanes Union High School District students are required by the California Community College System to have a school administrator approve any request to enroll in a community college course. Community college courses are not accepted for original credit in lieu of course required for graduation by the Acalanes Union High School District.

AUHSD Graduation Requirements and Course Pathways

- Students must earn minimum of 240 credits to graduate from Acalanes, Campolindo, Las Lomas or Miramonte High School
- Students graduating from Acalanes Center for Independent Study (ACIS) must earn 205 credits (Please visit ACIS section of the catalog for specific graduation requirements)
- Students earn five (5) credits for every semester course they complete with a "D" or better
- The following specific requirements and courses **MUST** be included (grade levels may be flexible in some areas where there is not a four-year requirement):

Subject	Credits	Grade 9	Grade 10	Grade 11	Grade 12
English	40	English 1	English 2	English 3 or	English 4 <i>or</i>

			Course		
Electives	65				

^{*}Students must pass Algebra 1 either in middle school or high school in order to graduate. Students who have already passed Algebra 1 in middle school must pass at least 30 credits of additional math courses in order to meet the graduation requirement. Algebra A and Algebra B sequence satisfies the Algebra 1 requirement. 10 credits earned by completing a Computer Science course may be applied towards mathematics credit.

^{**} Students must complete 20 credits in the area of Physical Education. Ten (10) credits must be completed by taking the PE 9 course. Students have options in how to obtain 10 credits in addition to PE 9. Please see the PE section of the Course Catalog for detailed information.

Guidelines for Selecting a Course

Students are encouraged to review the information in the Course Catalog and the course descriptions prior to signing up for a particular course. Additionally, students are encouraged to consider the following course selection guidelines when planning an overall schedule.

- 1. Graduation Requirements. Carefully check the AUHSD graduation requirements.
- 2. College Entrance Requirements. Look for courses required by many colleges and universities.
- 3. Your interests. Look for courses which might have relevance or interest to you.
- 4. **Overall course schedule.** Examine the overall rigor of selected classes.
- 5. Parent approval. Talk to your parents about your course choices.
- 6. **Teacher recommendation.** Talk to your teachers to determine appropriate course selection.

Schedule Changes

Master schedules and course offerings are based on student selection. The counselors inform every student, through the scheduling process, of the seriousness of their course selections. Please note that students' course schedules are not based on period requests or teacher requests.

- All 9th, 10th and 11th graders must be enrolled in at least six classes.
- 12th graders must be enrolled in at least five classes except for students enrolled in ROC/P county programs, community college courses, independent study or other courses authorized by the AUHSD Governing Board. Program enrollment must be pre-approved by the principal.
- Any course dropped after the end of the 1st quarter is a drop with an F grade.
- Students must demonstrate satisfactory educational progress in the previous grading period by maintaining a minimum 2.0 grade point average, and minimum progress toward meeting AUHSD graduation requirements and maintain satisfactory citizenship (behavior) as defined in school and district policy to be eligible for athletics and other extra and co-curricular activities.

Course changes will not be made to accommodate extra-curricular schedules, personal preferences, teacher, or period preferences. Requests to drop one class and enroll in another must be made within the first 10 days of the semester. Requests will be granted based on course capacity and availability. Students may request schedule changes based on the following reasons:

- Inappropriate course placement level for student (academic misplacement)
- Missing course for graduation requirement or course required to meet minimum college eligibility
- Change in elective class

Students are expected to select classes carefully and to maintain a firm commitment to continue enrollment in their classes once the school year begins.

Counseling Department

The counseling program is designed to assist students with academic, personal, and life-planning choices as students become increasingly self-reliant and independent during their four years of high school. Counselors work with students divided by alphabetical groups, which allows students to work with the same counselor throughout their high school career. Counselors meet with students in groups (classroom and evening presentations) and on a one-to-one basis.

Each comprehensive school site has a Wellness Center that works in collaboration with the Counseling Department and the Health Office to expand existing support services for students. Wellness support services include both direct services as well as prevention and education for students including health and wellness classroom presentations, workshops, and school-wide health education events.

Students are encouraged to contact their counselor with any questions concerning course selection and planning. At the start of the second semester counselors will provide students with an overview of the course schedule for the upcoming year. Counselors will also guide students through the planning and selection process as well as distribute and collect course request materials.

College & Career Center Resources

College and Career Center is available to all students and families for the following services.

Naviance – Online Planning Resource

Naviance is a web-based program available to all students to explore different colleges and post-high school options. The program contains important data that will help students make informed decisions when applying to colleges as well as function as a communication tool when requesting teacher recommendations letters.

College and Career Center Additional Resources

- College and university information: catalogs/reference books: two-year, four-year, in-state, out-of-state, public and private colleges
- Testing dates and registration materials: PSAT, SAT, SAT Subject Tests, ACT, Advanced Placement
- Scholarship and financial aid information and application forms
- Trade, technical and specialty school information
- Regional Occupational Program (ROP) information
- SAT and ACT prep workshop information
- Summer opportunities information
- Part-time job placement
- National Collegiate Athletics Association (NCAA) information
- Fall college representative visits

College & Career Planning

College Preparatory Checklist

The following checklist may be helpful to stay organized on the path to college. These are general guidelines and not all items are listed or applicable to everyone.

Freshman Year

- Visit all the resources on campus Library, Counseling Office, College & Career Center
- Establish strong study habits and time management techniques
- Participate in extra-curricular activities and work toward leadership positions. Get involved! Join clubs, ASB and play sports!
- Explore and participate in community service
- Meet your counselor and review your four year plan
- Register with Naviance and take some of the college/career/personality inventories
- Start a list of accomplishments or awards to be used when preparing a resume or college applications

Sophomore Year

- Concentrate on academic preparation and continue to develop basic skills and extracurricular interests
- Take the Practice SAT Exam (PSAT)
- Take the SAT Subject Exam in June in subjects you have completed (i.e. Biology, Chemistry)
- Attend College Fairs to learn about college entrance requirements
- Explore Naviance and do some college/career browsing
- Volunteer, work or take classes over summer
- Add to your list of accomplishments

Junior Year

- Take the Practice SAT Exam (PSAT)
- Register for SAT, SAT Subject, and/or ACT Exam and complete your testing by June of your junior year
- Attend fall College Fair to learn about college entrance requirements and sign-up in the College and Career Center to meet College Admission Representatives
- Continue with community service
- Research and/or visit college campuses during your vacations
- Athletes: To play college athletics you must be certified by the NCAA. Start this process in late spring of your junior year at <u>www.eligibilitycenter.org</u>

Senior Year

- Check the College and Career Center for upcoming events and important deadline information
- Decide which colleges interest you. Most college applications can be accessed through the Common Application
- Contact teachers for letters of recommendation
- Sign up in the College and Career Center for College Admission Representative
- Know the various applications deadlines and submit applications on time
- Attend Financial Aid Workshop for parents and students
- Research and apply for scholarships

Alternative Program

Acalanes Center for Independent Study (ACIS)

Acalanes Center for Independent Study, located on the Del Valle campus, offers alternative instructional programs and different diploma requirements than the comprehensive schools. It offers students a flexible daily schedule, which cannot be met by regular high school programs. ACIS offers a college preparatory program for all students. ACIS classes meet the University of California "a-g" requirements. Limited elective courses are provided for students and students may enroll in adult education, ROP or concurrently enroll in community college classes or one of the AUHSD comprehensive high schools.

Students enrolled in the ACIS program have an opportunity to take a variety of online courses in addition to the classroom based courses.

ACIS is a fully accredited high school by the Western Association of Schools and Colleges. For a full list of course offerings at the ACIS, please see the ACIS Course Offerings Summary in the Course Catalog addendum.

Acalanes Center for Independent Study Graduation Requirements (Grade levels are suggested and may be flexible when it is not a four year requirement)

Regional Occupation Program (ROP)

The Regional Occupation Program (ROP), administered collaboratively by the Acalanes Union High School District and the Contra Costa County Office of Education, provides school-to-career preparation classes for juniors and seniors. Classes are designed to help students learn about career choices, develop job skills, and gain skills useful in college. Most classes can be taken for one or two periods, and some include internships. Students earn elective credits, and some classes offer transferable college credits. Many ROP courses fulfill University of California "a-g" subject matter entrance requirements. Students also are eligible to take ROP classes located off campus. Students must be 16 years of age to enroll in ROP classes.

ROP Courses anticipated to be offered in 2020-2021 in the Acalanes Union High School District

AUHSD Course Offerings

How to read the Course Catalog?

This course begins with a snapshot examination of global government systems in 1750. The course then covers a period of more than 250 years and highlights the intensification of a truly global history as people, products, knowledge, and ideas increasingly spread around the world. It examines dynamic forces such as democracy, nationalism, and economic competition and how these forces impacted the modern world. The course also considers the themes of war and conflict resolution, inclusiveness of governance, the concept of justice, and the growing importance of individual rights and liberties. The course ends with the continued evolution of a global society as shaped by globalization, terrorism, and technology.

Throughout the course, students develop reading, writing, speaking, and listening skills to enhance their understanding of the content. Students engage with history as an investigative discipline, one that is continually reshaped based on inquiry, primary and secondary source research, and multiple new perspectives. Students will gain an appreciation of history and become more informed citizens in their community, country, and the world.

Career Technical Education

AUHSD Career Technical Education (CTE) involves a multiyear sequence of courses that integrates core academic knowledge with technical and occupational knowledge to provide students with a pathway to postsecondary education and careers.

Graduation Requirement

Career Technical Education is part of the AUHSD Breadth Graduation Requirement.

AUHSD CTE Graduation Requirements:

AUHSD students must obtain 20 credits taken in any of the following areas: Career Technical Education (CTE), World Language or American Sign Language

Minimum UC/CSU Entrance CTE Requirement:

None

AUHSD Career Technical Programs:

Note: Courses below are offered in the Acalanes Union High School District however not all courses are offered at all sites. Please look at the course descriptions to determine if a course is offered at the specific school site.

Career Technical Education

Architectural Design

Architectural Design is a course in which students will express themselves visually and be able to showcase their creativity. Instruction will be given in the following areas: elements of design, architectural history, technical drafting, sketching, and computer design. The course will give the students confidence in organizing ideas and the ability to work ideas into new useful creations and reinforce concepts and ideas learned in math, art and social science.

Principles of Engineering

Principles of Engineering is a foundation course of the high school engineering pathway. This survey course exposes students to some of the major concepts that they will encounter in a post secondary engineering course of study. Through problems that engage and challenge, students explore a broad range of engineering topics, including mechanisms, the strength of materials and structures, automation, and kinematics. The course applies and concurrently develops secondary level knowledge and skills in mathematics, science, and technology. This course follows introduction to Engineering Design course and is an part of an engineering course sequence.

Preferred Previous Course of Study:

Schools:	М	Grades:	10 11 12	Term: Year	UC/CSU 🗹

Computer Integrated Manufacturing (Engineering and Robotics)

In this course students will learn automated manufacturing concepts by creating three-dimensional designs with modeling software and producing models of their designs on computer numerically controlled machine tools. The topics covered include robotics, machine tool operating, industrial practices, tool motion, CNC programming, simulations, prototyping, and manufacturing systems. Integrated throughout the course are career technical education standards which include academics skills, communication, career planning, technology, problem solving, safety, responsibility, ethics, teamwork, and technical knowledge. This course is part of an engineering course sequence and follows Project Lead the Way Curriculum.

Introduction to Wood Technology & Engineering

Introduction to Wood Technology and Engineering course provides students with an opportunity for hands-on learning and development of critical thinking skills as well as an introduction to engineering through the artistic medium of wood. Throughout the course, students will gain the knowledge to safely operate and maintain both hand and power tools as well as woodworking machines. Throughout the semesters, students will complete one project while learning the identification and use of tools, woods, basic joinery and finishing techniques, and CAD and CNC basics. Emphasis is placed on safety, responsibility, and cooperation.

Course has been submitted and is pending a-g approval.

Preferred Previous Course of Study:

Foods Adv. Internat'l Cuisine

This course focuses on understanding the differences and commonalities we have with other cultures around the world. A common denominator in studying world cultures is cuisine. In studying the cuisine of a people or a region, we learn about a country's geography and climate, traditions, taboos and social mores, unique adaptations caused by environment on a food supply, pressures on a population to trade, export, import, permit a closed or open society, and cultural values. Students will acquire a greater understanding of their world and the cultural diversity that exists in their own community. This course may be offered as an ROP course.

Preferred Previous Course of Study:

Foods 1

Schools: L	Grades:	10 11 12	Term: Year	UC/CSU 🗹

Work Experience Education

Work experience is a one-semester elective class combining paid employment experience with classroom instruction emphasizing an introduction to work necessary for job success and fulfillment and classroom training in employability skills. Students are employed and paid a standard wage at the job site while enrolled in a concurrent course at their high school. Students develop positive work habits, self-confidence, and job related skills which can be used to locate, secure, and retain employment in the community. Students must attend weekly related instruction meetings at their school, undertake lessons and activities, and acquire general and specific occupational skills through a combination of supervised paid employment and instruction. Regular job site visitations and supervision by the work experience coordinator is a fundamental part of the course. Students must be at least 16 years of age and concurrently employed a minimum of five hours per week in a paid position covered by workmen's compensation. Work Experience Education is only offered on the Las Lomas campus. Students at other campuses may consult with their counselor to pursue this option.

English and English Language Development

English 1

English 1 focuses on the study of reading, writing, language, and speaking and listening as outlined in the California Common Core State Standards. There is an emphasis on critical thinking, increasingly complex texts, informational text and nonfiction, integrating technology, and academic vocabulary.

AP English Language & Composition

A C L

The AP English Language and Composition course focuses on the development and revision of evidence-based analytic and argumentative writing, the rhetorical analysis of nonfiction texts, and the decisions writers make as they compose and revise. Students evaluate, synthesize, and cite research to support their arguments. Additionally, they read and analyze rhetorical elements and their effects in nonfiction texts—including images as forms of text— from a range of disciplines and historical periods. This course may be taken to satisfy the third year of English language requirement.

English 4

English 4 builds and extends the knowledge learned in English 3 and focuses on the study of reading, writing, language, and speaking and listening as outlined in the California Common Core State Standards. There is an increased attention on critical thinking, increasingly complex texts, informational text and nonfiction, integrating technology, and academic vocabulary. Emphasis is placed on world literature and nonfiction. The course prepares students for the rigor of college-level reading and writing.

Preferred	Preferred Previous Course of Study:								
English 3									
Schools:	А	С	L	м	Grades:	12	Term: Year	UC/CSU	✓

AP English Literature & Composition

In the AP English Literature and Composition course, students devote themselves to the study of literary works written in, or translated into, English. Careful reading and critical analysis of such works of fiction, drama, and poetry provide rich opportunities for students to develop an appreciation of ways literature reflects and comments on a range of experiences, institutions, and social structures. Students will examine the choices literary writers make and the techniques they utilize to achieve purposes and generate meanings. This course may be taken to satisfy the fourth year of English language requirement.

Preferred Previous Course of Study:

English 3										
Schools:	А	С	L	М	Grades:	12	Term: Year	UC/CSU	✓	

English 4: Deconstructing Race

English 4: Deconstructing Race course builds and extends the knowledge learned in English 3 and focuses on the study of reading, writing, language, and speaking and listening as outlined in the California Common Core State Standards. In this course, students will discuss, write, and engage in research about their origins, their identities, and the awareness of how race, racism, and anti-racism impact their lives. This course may be taken to satisfy the fourth year of English language requirement.

Course has been submitted and is pending a-g approval.

Preferred Previous Course of Study:

English 4: Don't Tread on Me: Rebels, Outcasts & Iconoclasts in Literature

English 4: Don't Tread on Me: Rebels, Outcasts and Iconoclasts in Literature builds and extends the knowledge learned in English 3 and focuses on the study of reading, writing, language, and speaking and listening as outlined in the California Common Core State Standards. There is an increased attention on critical thinking, increasingly complex texts, informational text and nonfiction, integrating technology, and academic vocabulary. This course will examine how a wide variety of characters seek to shape their own paths despite legal, social, cultural and religious restrictions. This course may be taken to satisfy fourth year of English language graduation requirement.

Preferred Previous Course of Study:

English 3					
Schools: A	Grades:	12	Term: Year	UC/CSU	✓

English 4: Literature, Film and Media

English 4: Literature, Film and Media Studies builds and extends the knowledge learned in English 3 and focuses on the study of reading, writing, language, and speaking and listening as outlined in the California Common Core State Standards. There is an increased attention on critical thinking, increasingly complex texts, information text and nonfiction integrating technology, and academic vocabulary. This course focuses on the role of media - film, tv, news, media, and technology - in the world today and uses seminal texts of literature to further analyze media and media influence. This course may be taken to satisfy fourth year of English language requirement.

Preferred Previous Course of Study:

English 3

English 4: The Mysterious, the Grotesque & the Fantastic

English 4: The Mysterious, the Grotesque and the Fantastic builds and extends the knowledge learned in English 3 and focuses on the study of reading, writing, language, and speaking and listening as outlined in the California Common Core State Standards. There is an increased attention on critical thinking, increasingly complex texts, informational text and nonfiction, integrating technology, and academic vocabulary. This course focuses on the evolution of the modern mystery plot, tracing a long arc from its emergence in eighteenth-century Gothic fiction to its contemporary reinventions in radio, movies, TV and podcasts. This course may be taken to satisfy fourth year of English language graduation requirement.

Preferred Previous Course of Study:

English 3

Schools:	A	Grades:	12	Term: Year	UC/CSU	✓

English 4/WISE

English 4 focuses on the advanced study of world literature and non-fiction, and prepares students for the rigor of college-level reading and writing. The course includes extensive writing, analysis of text, and literary criticism, as well as the development of speaking, listening and vocabulary skills. WISE emphasizes real world, outside-of-the-classroom experience and is designed for the self-motivated student. This course meets the needs of seniors interested in an alternative to the 8th semester of traditional English 4 curriculum. As the district's mission statement encourages, this course offers students the opportunity to "excel in a global society." (5 units per semester).

Preferred Previous Course of Study:

English 3						
Schools:	Μ	Grades:	12	Term: Year	UC/CSU	✓

Journalism 1-4

Journalism students will expand their English/Language Arts and visual arts skills through creating and publishing the school newspaper. Students are required to write monthly assignments for the newspaper and other class projects. They practice varied forms of journalistic writing including news, features, and sports stories, as well as reviews and editorials. Students learn laws and ethical standards related to journalism. In the process of writing their stories, laying out newspaper pages, and designing advertising, students learn to use specialized software for word processing, page layout, and graphic design. This course is designed for students who are interested in refining their writing skills as well as exploring careers in journalism. This course may be offered as an ROP course. Pre-Requisites: Journalism 1: English 1 and teacher approval; Journalism 3: Journalism 2 and teacher approval.

English L	anguag	ge De	evelopm	nent (ELD)						
The English Language Development (ELD) program is for students who are not proficient in English. The ELD program helps students master English so they can be successful in their academic courses. There are three areas of instruction: Reading, Grammar and Writing, and Conversation and Vocabulary. Students take placement tests to see which level they need, and they take quarterly benchmark tests to assure they are ready for the next level. ELD Reading focuses on word analysis and vocabulary, reading comprehension and analysis strategies, and reading fluency. ELD Grammar and Writing teaches the conventions of English: syntax, verb tenses, sentence structure, and composition. ELD Conversation and Vocabulary focuses on students' speaking and listening skills, as well as developing their knowledge of content area and academic vocabulary. Mathematics

AUHSD Mathematics courses require students to grapple with solving problems, develop abstract, analytic thinking skills, learn to deal effectively and comfortably with variables and equations, and use mathematical notation effectively to model situations.

Graduation Requirement

AUHSD Math Graduation Requirements:

30 credits of math are required for graduation.

Students must pass the equivalent of two semesters of a course of study beyond Algebra 1. Up to 10 credits may be obtained by successfully completing a computer science course.

Minimum UC/CSU Entrance Math Requirement:

30 credits of math (through Algebra 2) are required. 40 credits are recommended.

AUHSD Math Course Sequence Options:

The table below includes possible math sequences. For a detailed sequence of math courses please visit the AUHSD Curriculum and Instruction website. Teachers and counselors should be consulted when selecting appropriate math level placement.

Note: Courses below are offered in the Acalanes Union High School District however not all courses are offered at all sites. Please look at the course descriptions to determine if a course is offered at the specific school site.

Mathematics

Algebra A

Algebra A reviews, formalizes, and extends the mathematics that students learned in Common Core math 6 through 8. This course includes content standards from the conceptual categories of Number and Quantity, Algebra, Functions, and Statistics and Probability. Through the application of the Standards for Mathematical Practice, students will increasingly engage with the subject matter and grow in mathematical maturity and expertise.

Financial Algebra

Financial Algebra is a mathematical course that is algebra-based and applications-oriented. The course addresses college preparatory mathematics topics from Algebra, Statistics and Probability and more under seven financial umbrellas: Banking, Investing, Credit, Employment and Income Taxes, Automobile Ownership, Independent Living, and Retirement Planning and Household Budgeting. The mathematics topics contained in this course are introduced , developed, and applied in an as-needed format in the financial settings covered. Students are encouraged to use a variety of problem-solving skills and strategies in real-world contexts, and to question outcomes using mathematical analysis and data to support their findings.

Algebra 2

Algebra 2 complements and expands the mathematical concepts of Algebra 1 and Geometry. Topics include the real and complex number systems. Families of functions studied include: linear, quadratic, polynomial, exponential, logarithmic, rational and radical functions. Other units included are statistics, sequences and series, and the study of parabolas as conic sections. An introduction to trigonometry includes the unit circle and graphing trigonometric functions.

Algebra 2 Advanced

The Algebra 2 Advanced complements and expands the mathematical concepts of Algebra 1 and Geometry and meets all the objectives of the Algebra 2 course. Topics include the real and complex number systems. Families of functions studied include: linear, quadratic, polynomial, exponential, logarithmic, rational and radical functions. Other units included are statistics, sequences and series, and the study of parabolas as conic sections. The curriculum in this course includes additional content intended to significantly expand students understanding of trigonometry. This includes studying circular trigonometry in greater depth, proving and applying trig identities, working with trigonometric applications and inverse trigonometry, and solving trigonometric equations. Students will frequently use models to make sense of problems in order to deepen their understanding of the concepts of Algebra 2.

Physical Education

AUHSD Physical Education (PE) courses provide students with high-quality, standards-based physical education instruction and help students learn not only the skills and knowledge to be physically fit and active, but also the confidence and positive attitude necessary to participate in physical activities.

Graduation Requirement

AUHSD PE Graduation Requirements:

AUHSD students must obtain 20 credits in the area of Physical Education. All students must take PE 9.

Minimum UC/CSU Entrance PE Requirement:

None

Additional PE requirements:

- California State Physical Fitness Test (required for all 9th graders)
- Students must pass 5 out of 6 of the Physical Fitness Tests by the end of their 9th grade, or they are required to enroll in PE in grade 10. Students in grades 10, 11 and 12 who have not passed 5 of 6 Fitness Tests must enroll in PE and retake the tests that have not been passed.
- 20 credits of PE are required as a graduation requirement.

AUHSD PE Course Sequence:

Note: Courses below are offered in the Acalanes Union High School District however not all courses are offered at all sites. Please look at the course descriptions to determine if a course is offered at the specific school site.

PE Weight Training PE Yoga, Pilates, and Fitness Training

Physical Education

California Physical Fitness Test

Every February, AUHSD students in grade nine will participate in the required California Physical Fitness Test. The health- related fitness test is intended to help students acquire lifelong habits of regular physical activity. The fitness test includes activities for the six standards of fitness, including:

- Aerobic activity
- Body composition
- Abdominal strength and endurance
- Trunk extension strength and flexibility
- Upper body strength and endurance
- Flexibility

There are two or three options for most fitness areas so that all students have the maximum opportunity to participate. Students must meet healthy standard in 5 of 6 areas. If a student does not meet the standard, state law requires that student to be enrolled in a physical education course every semester until the student retakes the California Physical Fitness Test and meets the criteria.

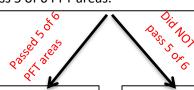

Physical Education Pathways

Physical Education 9 (PE 9)

All students must take PE 9 to fulfill the AUHSD Graduation Requirements. Students will obtain 10 credits towards the PE graduation requirement.

Physical Fitness Test (PFT)

All students must participate in Physical Fitness Testing. Students are expected to pass 5 of 6 PFT areas.

Students may obtain additional 10 credits in the area of PE by completing one of the following options:

- 1. Enroll and complete a PE elective course (2 semesters, 10 credits) during 10th grade
- 2. Postpone PE course enrollment until 11th or 12th grade.
- Obtain PE credits by participating in a CIF approved sport. CIF approved sports are sports offered at the AUHSD schools. Participation in sports outside of the school cannot result in PE credit. Completion of 2 seasons of sport, with the completion of the required paperwork will result in 10 PE credits. *This option is not available to 12th grade students.*
- 4. Obtain PE credits by participating in 1 season of sport and one semester of PE elective course.

Student must enroll in a PE course in grade 10. This course can be any of the AUHSD PE electives.

Students will have an opportunity to retake the portions of the Physical Fitness Test which they failed on the first try. Should a student pass the testing components resulting in the overall 5 out of 6 passing score, they may obtain PE credits by completing any of the options listed to the left.

Physical Education

PE 9

The ninth grade Physical Education course encompasses areas of physical education and is based on the California PE Model Standards. Students will focus on the development of proficient movement skills in each area of physical education; expanding their capabilities for independent learning; and examining practices that allow for sound decision making to enhance successful participation in movement activities.

Athletic Physical Education

The purpose of Athletic Physical Education is to provide options for student to engage in alternative pathways for which they can receive physical education credit towards graduation. To ensure that all students are exposed to a well-rounded Physical Education curriculum and participate in a series of state-mandated physical performance tests later in ninth grade, freshmen are not eligible to participate in Athletic PE. This program allows eligible students to gain up to 10 credits in the area of Physical Education by participating in the California Interscholastic Federation (CIF) approved sports. CIF sports are school sponsored sports and do not include sports offered outside of the school. Students gain five (5) credits for participating in a season of sport. Participating in two (2) seasons of sport will earn a student 10 credits. Students may not earn more than 10 credits through Athletic PE. The program is not available to 12th grade students.

Science

AUHSD Science courses support the overarching goal of science education to prepare students to have appreciation of the beauty and wonder of science, instill sufficient knowledge of science and engineering, and become careful consumers of scientific and technological information related to their everyday lives as well as the ability to continue to learn about science outside the school and have the skills to enter careers of their choice in science, engineering and technology.

Graduation Requirement

AUHSD Science Graduation Requirements:

AUHSD students must pass two years of science including one year of life and one year of physical science.

*While the AUHSD graduation requirement is for students to take 2 years of science, students are strongly recommended to take three years.

Minimum UC/CSU Entrance Science Requirement:

Two years of lab science; one year of life (biological) and one year of physical science. Third year is strongly recommended.

AUHSD Science Course Sequence Options:

The table below includes most commonly taken science course sequences. Science electives are often taken by many AUHSD students and are listed below the table. Students should consult with their science teachers and counselors when deciding on the appropriate science elective placement.

Note: Courses below are offered in the Acalanes Union High School District however not all courses are offered at all sites. Please look at the course descriptions to determine if a course is offered at the specific school site.

Science

The Living Earth (formerly Biology)

The Living Earth course, based on the Next Generation Science Standards, explores relationships between the living and nonliving components of Earth's systems. By using science and engineering practices, cross-cutting disciplinary concepts, and evidence from experiments, research, and observations, students will learn how to formulate questions, evaluate claims, and develop models to make interpretations and investigate the natural world. Topics will include: Ecosystems Interactions and Energy, History of Earth's Atmosphere: Photosynthesis and Respiration, Evidence of Evolution, Inheritance of traits, Structure, Function, and Growth (from cells to organisms) and Ecosystem Stability and the Response to Climate Change.

The Living Earth course is replacing the Biology course and is required for graduation.

2020-2021 AUHSD Course Catalog - Science

Physiology

Physiology is a course that examines the inner workings of the human body in terms of structure and function along with systemic relationships focusing on the tissues, integumentary, skeletal, muscular, nervous, cardiovascular, immuna, respiratory, digestive, urinary, reproductive and endocrine systems. This course will involve laboratory activities, projects, dissections, textbook material, models, diagrams, journal writings and clinical studies. Students will actively ask, find, and determine answers related to human biology in health and disease.

Preferred Previous Course of Study

Biotechnology

Biotechnology instructs students in the laboratory techniques and basic concepts of the field of bioscience. Included are DNA labs, making gels for electrophoresis, bacteriological techniques such as plating, culturing strains of bacteria and manipulating the DNA to achieve transformation of the colonies, determining and making solutions, and microscopic techniques such as oil-emersion and staining of various types of tissue. Instruction in DNA theory, ethics, and technology and society will be included to acquaint students with this rapidly developing field. Students will conduct individual and team research projects and use effective technical writing to express the results of their work. Sound laboratory procedures and safety will be stressed. Students will use and analyze research publications and scientific literature. Opportunities for post-secondary education will be explored and students will gain a broad awareness of both scientific and technologial career paths. This course may be offered as an ROP course.

Engineering & Applied Physics Honors

Engineering and Applied Physics covers topics generally covered in an introductory college engineering course. The course provides an introduction to the engineering profession. Introductory material in chemical, mechanical, aerospace, electrical, computer, civil and biomedical engineering will give the students an appreciation of the diversity of the field. Students will perform a variety of structured activities and will be expected to complete a final project that integrates topics learned throughout the year.

Schools: A C	Grades:	11 12	Term: Year	UC/CSU 🔽

Principles of Biomedical Science

Principles of Biomedical Science course provides students with an introduction to biomedical science through exciting hands-on projects and problems. Students investigate concepts of biology and medicine as they explore health conditions including heart disease, diabetes, sickle-cell disease, hypercholesterolemia, and infectious diseases. Students will practice problem solving with structured activities and programs to openended projects and problems that require them to develop planning, documentation, communication and other professional skills. The course is designed to provide an overview of all the courses in the biomedical science program and lay the scientific foundation for subsequence courses.

---	---------------------

Human Body Systems

Human Body Systems course builds upon knowledge gained in the Principles of Biomedical Science and is a course where students examine the interactions of human body systems as they explore identity, power, movement, protection, and homeostasis (balance) in the body. Exploring science in action, students build organs and tissues, use data acquisition software to monitor body functions such as muscle movement, reflex and voluntary action, and respiration; and take on the roles of biomedical professionals to solve real-world medical cases.

Preferred Previous Course of Study

The Living Earth, Algebra 1, Principles of Biomedical Science

Schools: L Grades: 10 11 12 Term: Year	UC/CSU 🔽
--	----------

Analytical Forensic Science

In this class, emphasis is on understanding the underlying scientific theories of forensic science. The class will build upon the student's prior knowledge of biology and chemistry, using analytical chemistry techniques to analyze and identify trace evidence, including DNA. Students will evaluate the constituents of materials by organic, inorganic, and biochemical analysis, and use their academic and laboratory skills to develop a deeper understanding of science.

A sound foundation in the scientific principles underlying the laboratory techniques is crucial to the education of a forensic scientist. This class prepares students to further their science education at the university level, and introduces them to the possibilities of a science related career. Integrated throughout the course are career preparation standards which include basic academic skills, communication, interpersonal skills, problem solving, workplace safety, technology and employment literacy.

Social Science

World History, Culture & Geography

This course begins with a snapshot examination of global government systems in 1750. The course then covers a period of more than 250 years and highlights the intensification of a truly global history as people, products, knowledge, and ideas increasingly spread around the world. It examines dynamic forces such as democracy, nationalism, and economic competition and how these forces impacted the modern world. The course also considers the themes of war and conflict resolution, inclusiveness of governance, the concept of justice, and the growing importance of individual rights and liberties. The course ends with the continued evolution of a global society as shaped by globalization, terrorism, and technology.

Throughout the course, students develop reading, writing, speaking, and listening skills to enhance their understanding of the content. Students engage with history as an investigative discipline, one that is continually reshaped based on inquiry, primary and secondary source research, and multiple new perspectives. Students will gain an appreciation of history and become more informed citizens in their community, country, and the world.

US History & Geography

United States History and Geography is a survey course of late nineteenth through twenty-first century American history, starting with a brief review of democratic foundations and the impact of the Civil War. Students will analyze turning points and themes related to American identity, the role of the government, and the American experience. Skills such as critical reading, writing, speaking and listening, research, and media literacy will be emphasized. Aligning with the California History-Social Sciences Framework, students will engage with the content, practice inquiry skills, improve literacy, and develop values of citizenship through this course.

Global Studies

Global Studies introduces students to the world by investigating modern issues in different parts of the globe and investigating the broader scale of those issues. Students will analyze the geographic, cultural, political, and historical aspects of the issues and apply them on a global scale. The course includes studies on wealth and poverty, the environment, migration/immigration, global conflicts/terrorism, and media literacy as well as breaking news/breaking world events. The course will encourage students to develop critical thinking skills through identifying long-term implications of both past and present events. Students will be required to read, discuss, debate, analyze, work in groups, and think critically on a variety of topics.

Introduction to Psychology

Psychology is the study of the behavior and thought of humans and other animals. Although it has been a topic of intellectual conjecture for centuries, psychology as a standard academic discipline is less than 150 years old. In that time it has branched off in many areas of specialization that address such issues as the development of children, the motivation of athletes, the best way to treat substance abuse, how people form memories, etc. This course is an introduction to the basic subfields within psychology. We will be researching famous psychologists, investigating contemporary examples of psychological phenomena, discussing experiences, and forming hypotheses about how and why people and animals think and behave.

Law and Society

Law and Society will involve students actively in conflict resolution through traditional legal models as well as alternative models of problem solving. Content will include the scope of traditional American law (criminal, tort, consumer, family, housing, and individual rights) as well as concepts and comparisons using international legal situations. Global law will be stressed. Problem-centered curriculum, rather than a content-centered base, will promote critical analytical thinking. Mock trials, simulations, and role-playing will be dominant modes of interaction. Socratic dialogue will engage the student actively in the classroom.

Preferred Previous Course of Study: N/A								
Schools:	С	L	М	Grades:	10 11 12	Term: Year	UC/CSU 🗹	

Law 2 Honors

This course will focus on the 20th century America and the history of investigation. Students will know how the American society, political systems, the criminal justice system, and specifically the investigation process for crimes function within a global context. Students will understand and appreciate the diversity in America and the world community. There will be a specific emphasis on critical thinking skills which includes Socratic seminar, national and international crime scene investigations, and a Model United Nations project focusing on international crimes and issues. There will be an additional focus on forensics, and evidence; specifically how technology has revolutionized all major criminal investigations throughout the global community.

AP Studio Art

This course is designed to encourage creative and systematic investigation of formal and conceptual issues, while placing an emphasis on making art as an ongoing process that involve the student in informed and critical decision making. AP Studio Art helps students develop technical skills and familiarize them with the functions of the visual elements. Students are encouraged to become independent thinkers who will contribute inventively and critically to their culture through the making of art.

Preferred Previous Course of Study:

Advanced	Art								
Schools:	А	С	L	М	Grades:	11 12	Term: Year	UC/CSU 🔽]

AP Art History

Advanced Placement (AP) Art History will provide an opportunity for students to investigate world art (painting and sculpture) and architecture. This course will appeal to students with an interest in both history and the visual arts. Students will examine and critically analyze major forms of artistic expression within a historical context from both the past and the present. AP Art History emphasizes understanding works of art within their historical contexts by focusing on issues such as politics, class, religion, patronage, audience, gender, function, and ethnicity.

Schools:	А	L	М	Grades:	9	10 11	12	Term: Year	UC/CSU	✓

3D ART 2

Students in 3-D Art 2 will participate in the next series of sequential learning experiences building upon skills/and techniques experienced in 3D Art 1. Media include wood, metal, plaster, clay, fibers and mixed media. An emphasis of the course is on developing a conceptual approach to studio practice, including further developing analytical and critical thinking skills, exploring art historical precedents, and effective communication skills. Additionally, second-year students will begin a concentration in a material or process of their choice.

Photo/Digital Design

Photography/Digital Design is a college-preparatory, interdisciplinary approach to visual arts and the humanities. The class enables students to achieve an understanding and appreciation of artistic expression and to write and discuss with discrimination about photography as applied to themes in the humanities and history. Course work will emphasize student-created photographic art works as well as analytical reading, writing, and critiques. Substantial outside reading and research on individual biographies of historic and contemporary photographers, as well as written reviews of works of photographers, will be required. Students will analyze photographic works through discussion or writing using the appropriate vocabulary for describing techniques and aesthetic qualities.

Video Production 3

Video Production 3 is an advanced video studies course that will draw upon the advanced video editing techniques learned in Video Production 1 and 2 while investigating new areas uncovered in the lower levels. Students will analyze the power of advertising by researching advertising techniques, target audiences and a variety of ads, learning to identify specific advertising techniques. They will examine the personal vision and belief systems of directors, specifically how a director incorporates political and religious beliefs into a film narrative. Also, students will analyze the changing treatment of race and gender in film and television through the years, reflecting upon how their depiction reflects the attitudes of society; study specific video techniques, such as set lighting, acting methods for the camera, differing video editing styles of diverse directors, and manipulation of more difficult software, including Garage Band, Adobe Go Live, Final Cut Pro, MPEG Streamclip, Adobe Image Ready, and Audacity.

World Languages

AUHSD World Language courses include a diverse and rich offering of languages other than English. Taking advantage of one of the numerous language offerings in AUHSD allows students an opportunity to acquire a second language and as a result sharpens their intellectual skills, increases their earning power and broadens their cultural understanding.

Graduation Requirement

World Language is part of the AUHSD Breadth Graduation Requirement.

AUHSD World Language Graduation Requirements:

AUHSD students must obtain 20 credits taken in any of the following areas: Career Technical Education (CTE), World Language or American Sign Language

Minimum UC/CSU Entrance World Language Requirement:

Two years of the same world language, third year recommended.

AUHSD World Language Offerings

Note: Courses below are offered in the Acalanes Union High School District however not all courses are offered at all sites. Please look at the course descriptions to determine if a course is offered at the specific school site.

	World Language Programs											
French 1,2,3 French 4 Honors AP French Language and Culture	Japanese 1,2,3 Japanese 4 Honors	Mandarin 1,2,3 Mandarin 4 Honors AP Chinese Language & Culture										
German 1,2,3 German 4 Honors AP German Language	Latin 1,2 Latin 3 Honors AP Latin Virgil Latin 5	Spanish 1,2,3 Spanish 4 Honors AP Spanish Language & Culture										

American Sign Language (ASL) is currently not offered as a classroom-based course at the AUHSD comprehensive schools sites. Students may take ASL for AUHSD credit only with counselor and administrative approval. The course must be offered through the school district, not an outside organization. ASL courses taken through programs without appropriate pre-approval may not count towards AUHSD graduation requirement.

World Languages

French 1

This introductory course in foreign language provides students who have no prior training in the language an opportunity to develop basic listening, speaking, writing, and reading skills. In addition to functional language skills, students are provided an introduction to the culture of countries whose language they are studying.

Preferred N/A	Pre	viou	is Co	ourse	of Study:

Mandarin 2

Mandarin 2 will broaden students' ability in the language of Mandarin (listening, speaking, reading and writing) and the understanding of the Chinese culture. It will enable them to read longer paragraphs and carry on extended conversations. By the end of the course, students will learn how to have extended conversations in Mandarin; further expand their knowledge of Chinese characters; and further expand their understanding of the Chinese culture.

Spanish for Heritage Speakers

Spanish for Heritage Speakers is a course for students who have Spanish speaking or bilingual background. During this course students will refine their listening and oral skills as they develop their formal reading and writing abilities in Spanish to expand the grammatical structures, orthography, accents and vocabulary beyond their region of origin. This course exposes students to Hispanic culture via high interest and culturally-relevant thematic units and will utilize authentic resources (videos, audio, articles, art, music, literature, etc) from Spanish and Latin American authors in order to gain and appreciation for the cultural perspectives associated with the cultural products and practices of the Spanish-speaking world.

2020-2021 AUHSD Course Catalog--World Languages

AP Spanish Language & Culture

While emphasizing the use of Spanish for active communication, this course encompasses aural/oral skills, reading comprehension, grammar, and composition. This course is designed to develop comprehension and expression of formal and informal spoken Spanish in an accurate and fluent fashion. Vocabulary development and the composition of expository passages are highlighted.

Preferred Previous Course of Study:

Spanish 4 Honors or equivalent experience

Interdisciplinary

AUHSD schools offer a variety of courses outside of traditional departments. Several courses are college preparatory and UC (a-g) approved.

Graduation Requirement

AUHSD students are required to take one course in Health sciences.

AUHSD Health Graduation Requirements:

AUHSD students must obtain 5 credits by passing the Human and Social Development Course.

Minimum UC/CSU Entrance Health Requirement:

None

AUHSD Non Departmental Offerings

Note: Courses below are offered in the Acalanes Union High School District however not all courses are offered at all sites. Please look at the course descriptions to determine if a course is offered at the specific school site.

Advanced Publications Leadership Human and Social Development Introduction to Ethnic Studies (semester) Peer Tutoring Publications (Yearbook) Sustainable Horticulture Sports Medicine ROP Sports Medicine Advanced ROP Staff Assistant

Interdisciplinary

Advanced Publications

This re-designated course will give students who repeat the Publications course for credit a chance to develop and grow their skills as leaders and editors for the course. It provides a designation for those students who serve as Editors for the course by acknowledging the increased responsibility and broad-range of skills needed by experienced students to successfully run a Publications course.

Preferred Course of Study:

Publicatior	าร							
Schools:	А	С	L	М	Grades:	11 12	Term: Year	UC/CSU 🖌

Human & Social Development

Human & Social Development is a foundational course that provides essential knowledge and skills to enable students to arrive at informed and healthy decisions in a complex and diverse world. This course emphasizes the following topics: identity, relationships, physical and mental wellness, substance use and abuse, and sexuality. The course also addresses some of the California Health Standards that include evaluation of valid health information, goal setting, analyzing perspectives and influences, and informed decision-making. Human and Social Development course is required for graduation.

Preferred Course of Study:

N/A									
Schools:	А	С	L	М	Grades:	10	Term: Semester	UC/CSU	✓

Introduction to Ethnic Studies

Introduction to Ethnic Students course will examine the perspectives and experiences of the ethnic, racial and cultural groups in the United States and their struggles for equality and justice. Students will study the meaning of race, nationality, ethnicity and culture in American society and the roles of stereotypes, racism and prejudice. Students will gain an understanding of themselves and others through classroom activities, discussions, guest speakers, debates, research projects and personal reflection. This class is designed to build understanding, communication and cultural bridges and to strengthen our multicultural and multiethnic school and society.

Course has been submitted and is pending a-g approval

N/A									
Schools:	А	С	L	М	Grades:	10 11 12	Term: Semester	UC/CSU	

Leadership

The Leadership class is designed to engage students in shaping a positive campus environment and culture, and to develop students' sense of social and civic responsibility. Students will develop leadership and management skills including: organization, goal setting, communication, problem solving, and decision making. Students will use these skills to plan and implement student activities on the school campus.

Preferred	Cou	rse	of St	tudy:

Schools:	А	С	L	М	Grades:	9	10	11	12	Term:	Year	UC/CSU	✓	

Peer Tutoring

Peer tutors work in classes, study hall and/or peer-tutor centers to help students with work in various academic subjects. Peer tutors should have strong skills in reading, writing, science, world languages or mathematics and should be genuinely interested in helping others to become successful students.

Preferred Course of Study:

N/A								
Schools:	А	С	L	М	Grades:	11 12	Term: Year	UC/CSU 🗌

Publications (formerly Yearbook)

Students participate in all phases of planning and designing the school yearbook, including: overall design, artwork, photography, copy writing, layout, organizing and writing. Important aspects of the course include meeting strict deadlines, working with a clear set of priorities, aesthetic judgment, cooperation with other students and community representatives and practicing effective leadership.

Sports Medicine

Sports Medicine is designed to explore human anatomy and physiology, and lays the foundation for further study of these sciences. Students learn how systems of the body function and interact through physical activity, and develop a thorough understanding of the structure and function of the musculoskeletal system. This knowledge serves as a platform for understanding the physiological response to injury and improving performance. Integrated throughout the course are career preparation standards, which include basic academic skills, communication, interpersonal skills, problem solving, safety technology and employment literacy.

Schools: A C	М	Grades:	12 T	erm: Year	UC/CSU	

Staff Assistant

Staff Assistant provides students the opportunity to develop communication skills, employability skills, and behaviors essential for employment, with emphasis on careers in education. Students must have the ability to work with others and independently. Staff assistants work under the direction and supervision of the assigned classroom teacher, office administrator or librarian. Students grade is not calculated into the students GPA.

Preferred Course of Study:

Staff approval									
Schools:	А	С	L	М	Grades:	10 11 12	Term: Year	UC/CSU	

Sustainable Horticulture

In this course, students will learn theories and principles of horticulture using the school campus as a living classroom. The course will also include topics related to sustainable gardening and farming, native plants, and the good and bad genetically modified organisms. Students will learn to propagate plant materials and identify plants, insects and diseases.
